# A warm welcome

Dear ETPN members, dear Nanomedicine colleagues,  
The European Technology Platform on Nanomedicine (ETPN) warmly welcomes you to the next edition of NanoMedEurope, NME23, organized in Liverpool. It follows the ETPN Braga meeting of last year. That meeting underlined that Nanomedicine is firmly established as enabling technology with industrial and clinical interest on the rise. With that level of maturity, new topics become important. Quality control, regulatory aspects and industrial support are becoming increasingly relevant. Neil Liptrott from the University of Liverpool, a university that recently joined as a member, is leading the local organization committee. He will organize a program that focuses on these 'new' topics in addition to the science that will always be essential to fill the pipeline.

NME23 will be a unique meeting in Europe to meet your nanomedicine colleagues. Not only by listening to great science, but also by joining in interactive networking sessions, and matchmaking events for European consortia..

NME 23 is going to be exciting. I hope to meet you in Liverpool!

Sincerely,

**Prof. Raymond Schiffelers**

Chairman, ETPN

Dear BSNM members and nanomedicine colleagues,

The British Society for Nanomedicine is very pleased to invite you to NanoMedEurope NME23, which will be hosted by the University of Liverpool, the founding institute of the BSNM. As co-chair of the BSNM and co-vice chair of the European Technology Platform on Nanomedicine (ETPN) it gives me great pleasure to see these two key organisations working together and co-hosting Europe's premier nanomedicine meeting.

Having been a member of the ETPN and BSNM from their earliest days, I have witnessed their continued support of the nanomedicine community as this area has continued to grow throughout Europe across disciplines and between different stakeholders including academics, clinicians, and industry. NME23 will offer a unique environment in Europe for our nanomedicine ecosystem to come together, to celebrate the most recent advances and work together to set out a future for nanomedicine across the continent.

I look forward to welcoming you to Liverpool next year.

**Prof Steven Conlan**

Chair of the British Society of Nanomedicine

Dear ETPN delegates, colleagues, and friends,

Firstly, a warm, Liverpool, welcome for what promises to be an excellent event. As a new member of the ETPN, the University of Liverpool is proud to host NME23 and continue our, longstanding cooperation with you all.

For most of you, this is likely your first time in Liverpool, and I hope you find the City as vibrant and welcoming as we all have come to know it, particularly as Liverpool will also co-host this year's Eurovision song contest. We hope to also give you an insight into the works, and expertise, in Nanomedicine within the City Region, and foster even greater collaboration between the various networks.

I look forward to meeting you all, in Liverpool.  
Sincerely,

**Dr. Neill Liptrott**

Reader in pharmacology at University of Liverpool

# Keynote speakers

*June 21, 2023*

## **Prof. Yvonne Perrie**

Head of Institute, Strathclyde Institute of Pharmacy and Biomedical Sciences, University of Strathclyde.

*"Enhancing the delivery of next generation RNA therapies through formulation design."*

*June 20, 2023*

## **Prof. Molly Stevens**

Professor of Biomedical Materials and Regenerative Medicine at Imperial College London.

*"Designing nanomaterials for therapeutics and ultrasensitive biosensing."*

The University of Liverpool was founded as a college in 1881 and is one of the original civic universities. Today it is one of the UK's leading research institutions with an annual turnover of £480 million, including £102 million for research. Liverpool is ranked in the top 1% of higher education institutions worldwide and is a member of the Russell Group and of the ETPN since 2022.

The NME23 conference will be held in the modern Teaching Hub502 & Guild of Students. Registration will take place in the Guild of Students directly outside the Courtyard. The Hub502 is interlinked with the Guild of Students and consists of modern lecture theatres and seminar rooms. The Courtyard would host posters, exhibitors and all catering for the event, hence optimizing your visibility all throughout the event.
